At a glance

IBM® DataPower® Gateway and firmware V7.1 deliver the following:

- A new DataPower Gateway appliance offering utilizes an extensible and modular architecture to offer a rich set of functionality in a single, consolidated product through licensed modules on both physical and virtual appliance form factors.
- The latest generation hardware platform is designed to provide increased performance and scalability to meet the needs of mission-critical applications.
- A single mobile, web, and cloud gateway solution integrates industry-proven access management capabilities of IBM Security Access Manager into the DataPower platform. This enables:
  - Secure, integrated, controlled, and optimized access to web, native, and hybrid mobile applications, which include those that were developed for IBM Worklight®
  - Reduced cost and time-to-value by securing access to a wide variety of applications and workloads, which include mobile, web, cloud, and APIs, with a single gateway platform deployed in the DMZ
  - Enforced, dynamic, context-based access policies, to improve overall security posture, through seamless integration with IBM Security Access Manager for Mobile
  - Traditional, web access management security on DataPower Gateway with web single sign-on, session management, and access policy enforcement for multi-factor authentication
- Delivers an easy-to-use, security-enhanced B2B integration in a software module.
- Empowers users with additional authentication capabilities for environments that are based on Microsoft™ technology.
- Provides reliability, availability, and serviceability enhancements.

Overview

DataPower gateway appliances are positioned to act as security and integration gateways for a full range of mobile, web, API, service-oriented architecture (SOA), business-to-business (B2B), and cloud workloads in a single, highly secure, highly consumable, DMZ-ready appliance.
DataPower Gateway is a new modular and extensible appliance offering in physical and virtual form factors. The physical appliance is built on the latest generation hardware platform designed to provide increased capacity, performance, and serviceability to meet mission-critical infrastructure requirements. In addition, firmware V7.1 delivers enhanced advanced security processing capabilities for mobile, web, and B2B workloads through flexible software modules.

DataPower Gateway is the new product name of a consolidated appliance offering that utilizes an extensible and modular architecture to offer the functionality provided by three products listed below, in a single, consolidated product through software modules on both physical and virtual appliance form factors:

- WebSphere® DataPower Service Gateway XG45
- WebSphere DataPower Integration Appliance XI52
- WebSphere DataPower B2B Appliance XB62

The new DataPower Gateway physical appliance is:

- Built on the latest generation, purpose-built hardware platform designed to provide increased capacity, performance, flexibility and serviceability as compared to its predecessors
- A single, consolidated, 2U high-density rack mount design

Firmware V7.1:

- Delivers new modular firmware architecture with new software modules
- Enables advanced security for mobile and web applications through a software module that is built on industry-leading IBM Security Access Manager technology, capabilities that includes:
  - A highly scalable reverse proxy for user access control and web single sign-on
  - An integrated enforcement point for context-based access policies of IBM Security Access Manager for Mobile
- Combines key access management features of IBM Security Access Manager with the inherent capabilities of DataPower Gateways for message-level security, IT platform security, and application integration. Users can implement a single gateway to help protect and securely integrate:
  - Mobile applications
  - Browser-based web applications and portals
  - APIs
  - SOA environments
  - B2B applications
- Provides B2B capabilities that were previously unique to the WebSphere DataPower B2B Appliance XB62 as a software module
- Adds Kerberos S4U2Self functionality to provide flexible authentication for Microsoft environments
- Provides reliability, availability, and serviceability enhancements

Note: This announcement fulfills the statement of direction in Software Announcement AP14-0369, dated October 1, 2014.

Key prerequisites

Firmware V7.1 requires a DataPower physical appliance or DataPower Virtual Edition.

For more details, refer to the Hardware requirements and Software requirements sections.
Planned availability date

November 21, 2014

Description

Emerging technology trends, like mobile and API management, allow businesses to expand the scope of valuable IT assets to new channels and use cases. These shifts in technology enable businesses to reach consumers, business partners, and clients anywhere in the world at any time. These new opportunities require the enterprise to accommodate additional security capabilities, access controls, and to manage the exponential growth in application traffic.

DataPower Gateway is the new name of a consolidated product that utilizes an extensible and modular architecture that offers the functionality provided by three existing products, namely WebSphere DataPower Service Gateway XG45, WebSphere DataPower Integration Appliance XI52 and WebSphere DataPower B2B Appliance XB62, in a single consolidated product through optional software modules on both physical and virtual form factors.

The modular design that is used by the new DataPower Gateway appliance provides existing DataPower Service Gateway XG45 functionality as the base product and Integration Appliance XI52 and B2B Appliance XB62 capabilities as optional software modules.

The DataPower Gateway physical appliance form factor includes:

- Purpose-built, DMZ-ready, 2U high-density rack mount design
- Latest-generation, high performance hardware technology that is designed to provide increased capacity, performance, flexibility, and serviceability compared to its predecessors
- Hardware cryptography accelerator card to improve performance of both transport, secure sockets layer (SSL) or transport layer security (TLS), and message level security processing
- Increased serviceability with multiple, field-replaceable parts
- Improved hardware diagnostics to help identify problems
- Two network I/O features for increased flexibility, throughput, and reduced latency
  - Eight 1 Gigabit Ethernet ports
  - Two 10 Gigabit Ethernet ports
- Embedded Hardware Security Module (HSM) optional physical module provides enhanced protection of cryptographic keys that is Federal Information Processing Standard (FIPS) 140-2 Level 3 certified

DataPower Gateway appliances and firmware V7.1 utilizes an extensible and modular architecture and provides enhanced security and integration support for mobile, web, and B2B workloads through optional software modules. They provide a consolidated mobile, web, and cloud gateway solution that integrates industry-proven, access management capabilities of IBM Security Access Manager into the DataPower platform. This enables users to implement a single gateway as policy enforcement point to provide security, control, optimization and integration for a full range of workloads helping to simplify infrastructure, reduce cost and improve time to value.
Converged policy enforcement and advanced security for mobile and web applications, which exploit the industry-leading capabilities of IBM Security Access Manager, include:

- A highly scalable reverse proxy for user access control, web single sign on, and session management
- The ability to enforce fine-grained, security policies in a high-performance environment to protect mission-critical web and mobile applications
- A converged, policy enforcement point to reduce network hops, reduce management complexity, and provide easier, single entry point for all types of traffic that include mobile, web, API, SOA, B2B, and cloud
- An ability to enable advanced authentication methods to enforce web and mobile security policies, such as, context-based access, one-time passwords and multi-factor authentications
- The capability to use predefined configuration patterns for securing, controlling, and optimizing mobile, web and API workloads

**Note:** IBM Security Access Manager Proxy module is required for the converged policy enforcement point functionality and is available on the following DataPower models:

- DataPower Gateway
- DataPower Gateway Virtual Edition (Developer, Production and Non-Production versions)
- WebSphere DataPower Service Gateway XG45 (2426 models only)
- WebSphere DataPower Service Gateway XG45 Virtual Edition (Developer, Production, and Non-Production versions)
- WebSphere DataPower Integration Appliance XI52 (2426 models only)
- WebSphere DataPower Integration Appliance XI52 Virtual Edition (Developer, Production, and Non-Production versions)
- WebSphere DataPower B2B Appliance XB62 (2426 models only)

The Developer version of DataPower Gateway Virtual Edition includes the IBM Security Access Manager Proxy module in the base product at no additional charge.

With this offering, you can have easy-to-use, security-enhanced B2B integration that:

- Provides B2B functionality that is available in existing WebSphere DataPower B2B Appliance XB62 as a software module
- Includes B2B protocol policy enforcement, access control, message filtering, and data security
- Supports EDIINT AS1, AS2, ebMS 2.0 protocols plus IBM MQ File Transfer Edition integration
- Includes EDI, XML and Binary payload routing
- Includes Trading Partner Profile Management for B2B governance
- Includes full features interface for B2B configuration and transaction viewing

**Note:** The B2B module is required for B2B integration functionality and is available on the following DataPower models:

- DataPower Gateway
- DataPower Gateway Virtual Edition
- WebSphere DataPower Service Gateway XG45 (2426 models only)
- WebSphere DataPower Service Gateway XG45 Virtual Edition
- WebSphere DataPower Integration Appliance XI52 (2426 models only)
- WebSphere DataPower Integration Appliance XI52 Virtual Edition
The Developer and Non-Production versions of DataPower Virtual Edition include the B2B module in the base product at no additional charge.

Integration and mainframe connectivity that:

- Provides integration functionality available in WebSphere DataPower Integration Appliance XI52 and B2B Appliance XB62 as a software module.
- Includes any-to-any message transformation between a wide range of data formats including text, binary, COBOL copybooks, industry standards and custom formats.
- Offers database connectivity to allow reading and writing of data to relational databases with support for IBM DB2®, IBM IMS™ DB, Oracle, Sybase, and Microsoft SQL Server.
- Supports IBM IMS Connect and IMS Callout capability to allow easy connectivity to and from IMS transactions.

**Note:** The Integration module is required for this integration and mainframe connectivity functionality and is available on the following DataPower models:

- DataPower Gateway
- DataPower Gateway Virtual Edition

The Developer and Non-Production versions of Virtual Edition include the Integration module in the base product at no additional charge.

Firmware V7.1 provides flexible, security policy enforcement for Kerberos environments by using S4U2Self. This can help provide protocol transition support by using S4U2Self. This enables transition into Kerberos environments even when the consumer used another authentication mechanism.

**Accessibility by people with disabilities**

A US Section 508 Voluntary Product Accessibility Template (VPAT) containing details on accessibility compliance can be requested at

DataPower Gateway Virtual Edition requires one of the following:

- Machine that supports VMware vSphere ESXi V5.0, V5.1 or V5.5 editions: Standard, Enterprise, and Enterprise Plus
- Machine that supports VMware Workstation V10
- Machine that supports VMware Player V6
- Machine that supports VMware Fusion V6
- Machine that supports Citrix XenServer V6.2
- IBM PureApplication System W1500 or W2500 Version 2.0
- PureApplication Service on SoftLayer with x86 hardware
- IBM SoftLayer bare metal instances using supported hypervisors

Minimum virtual resources for each virtual edition appliance: 4 GB vCPU and 4 GB RAM

Physical specifications

Dimensions

8436-52X and 8436-53X models

Height: 88.9 mm (3.5 in.)
Width: 438 mm (17.25 in.)
Depth: 584 mm (23 in.)
weight: 21 kg (46.2 lb)
Electrical
8436-52X and 8436-53X models (Each contain two 720-watt power supplies)

100 - 127 (nominal) V AC; 50 Hz or 60 Hz; 10.0 A
200 - 240 (nominal) V AC; 50 Hz or 60 Hz; 5.0 A

Standards
This system supports or complies with the following standards:

- Multiprocessor Specification (MPS) 1.4
- Hardware-enabled to meet the International Organization for Standardization (ISO) 9241, Part 3

Equipment approvals and safety

- Japan VCCI, Class A
- Australia/New Zealand AS/NZS CISPR 22, Class A
- Korea KN22, Class A, KN24
- Taiwan BSMI CNS 13438 Class A; CNS 14336
- China CCC
- IEC 60950-1

Homologation
This product is not certified for direct connection by any means whatsoever to interfaces of public telecommunications networks. Certification may be required by law prior to making any such connection. Contact an IBM representative or reseller for any questions.

Software requirements
DataPower Virtual Edition requires one of the following:

- VMware vSphere V5.0, V5.1 or V5.5 editions: Standard, Enterprise, and Enterprise Plus
- VMware Workstation V10
- VMware Player V6
- VMware Fusion V6
- Citrix XenServer V6.2

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Planning information

Customer responsibilities
This product is designated for customer setup. Customer setup instructions are shipped with the product.

Installability:
Each IBM DataPower Gateway appliance requires approximately 30 minutes for installation. Installation includes unpacking, rack-mounting, connecting network and console cables, and powering on the system. Additional time is required to configure the software.
**Packaging**

The DataPower Gateway appliance is shipped in a single package.

The appliance carton contains:

- Appliance
- Two power cords
- Installation Guide
- Quick Start Guide
- Safety Pointer sheet
- Resource Kit CD
- Warranty flyer
- Console serial cable
- Rack-mount kit, including two rack power cords

**Security, auditability, and control**

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

---

**Ordering information**

This product is only available via Passport Advantage. It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use. Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.
When a customer orders a license to the program other than via Passport Advantage, these programs are licensed under the IBM Program License Agreement (IPLA) and the associated Agreement for Acquisition of Software Maintenance, which provide for support with ongoing access to releases and versions of the program. IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with the initial license acquisition of each program acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available. These programs have a one-time license charge for use of the program and an annual renewable charge for the enhanced support that includes telephone assistance (voice support for defects during normal business hours), as well as access to updates, releases, and versions of the program as long as support is in effect.

**Software Services**

IBM Software Services has the breadth, depth, and reach to manage your services needs. You can leverage the deep technical skills of our lab-based, software services team and the business consulting, project management, and infrastructure expertise of our IBM Global Services team. Also, we extend our IBM Software Services reach through IBM Business Partners to provide an extensive portfolio of capabilities. Together, we provide the global reach, intellectual capital, industry insight, and technology leadership to support a wide range of critical business needs.

More information regarding IBM DataPower technology can be found in the comprehensive portfolio of education services which is available from the WebSphere Education team. The curriculum provides a unique training value built on exclusive product knowledge, a complete education experience, and flexible options.

To obtain more information regarding the WebSphere education team offerings visit

To learn more about IBM Software Services or to contact a Software Services sales specialist, visit

**License Information number**

The program’s License Information will be available for review on the IBM Software License Agreement website

**Limited warranty applies**

Yes

**Limited warranty**

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional charge. For further information, consult the *IBM Software Support Handbook* found at

http://www.ibm.com/support/handbook
IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Appliance Subscription and Support (Appliance Maintenance) also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months’ notice.

IBM DataPower Virtual Edition is supported for the lifecycle of the corresponding IBM DataPower firmware version. IBM DataPower Virtual Edition V7.1 has the same end of support date as the IBM DataPower firmware V7.1.

IBM DataPower provides a minimum of two years of support for each firmware release beginning at the general availability of the release. IBM DataPower customers with active subscription and support are entitled to the latest three levels of firmware support. These releases with the latest updates will be available on the support website. Releases of the IBM DataPower firmware that are older than two years and are not within the three latest levels of firmware are subject to withdrawal of support.

You will receive a notification of discontinuance of firmware support with 12 months notice.

For additional information, visit

http://www.ibm.com/support/docview.wss?rs=2362&uid=swg21246298

This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Subscription and Support also provides you with access to updates (modifications or fixes), and releases.

Money-back guarantee

If for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

Money-back guarantee does not apply to hardware appliances.

For clarification, note that (1) for programs acquired under the IBM International Passport Advantage offering, this term applies only to your first acquisition of the program and (2) for programs acquired under any of IBM’s On/Off Capacity on Demand (On/Off CoD) software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Other terms

Volume orders (IVO)

No
IBM International Passport Advantage Agreement

Passport Advantage applies
Yes, and through the Passport Advantage website at
http://www.ibm.com/software/passportadvantage

Usage restriction
Yes. Adding, removing, or replacing hardware components of DataPower Gateway System must be performed by IBM.

Software Subscription and Support applies
Yes. Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express®. Product upgrades and Technical Support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, only to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your IBM Software Support Handbook at
http://www.ibm.com/support/handbook

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

http://www.ibm.com/software/passportadvantage

System i® Software Maintenance applies
No

Variable charges apply
No

Educational allowance available
Not applicable.
Statement of good security practices

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered, destroyed, or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

Prices

IBM Global Financing

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, from both IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

http://www.ibm.com/financing

IBM Global Financing offerings are provided through IBM Credit LLC in the United States, and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

Financing from IBM Global Financing helps you preserve cash and credit lines, enables more technology acquisition within current budget limits, permits accelerated implementation of economically attractive new technologies, offers payment and term flexibility, and can help match project costs to projected benefits. Financing is available worldwide for credit-qualified customers.
